

Harvest More Leads With ProspectFinder® Farm

ProspectFinder Farm is DataQuick's intuitive Internet-driven farming tool. This robust marketing application gives you access to all the key features of ProspectFinder 4.5 and more, allowing you to generate marketing lists within a state or county based on:

- Target property
- The entire county
- Radius
- ZIP Code
- Subdivision/tract
- Parcel book page
- APN

With ProspectFinder Farm, Realtors, Title professionals and small business owners can customize their marketing lists to target properties located in specific areas. It doesn't get any easier to create effective marketing campaigns!

Features and Benefits

- **Enhanced search criteria**, including use codes and property characteristics to further narrow your search
- **Search display mode** only shows search filters that are adequately populated throughout the county, saving you valuable time
- **Various output file types**, ranging from labels to CSV, which allows the ability to arrange columns in the order you prefer and even customize how you want your text to appear
- **Increased search speed**, returning counts and giving you access to your marketing lists in less time
- **Expanded selection of search filters**, allowing you to select from a variety of different data filters, which help generate more targeted and cost-effective marketing campaigns

Zero-in on exactly what you need to generate efficient marketing lists by target property or geography.

ProspectFinder Farm expands beyond the typical Zip Code and radius search criteria; rather, this comprehensive tool allows you to choose from a wide range of geographic parameters.

When downloading your list, choose from several output options from CSV, label, Expanded Comma Delimited, or DQ Super Farm. You can also fully customize your field selection from arranging columns to changing the appearance of text.
